PROFILE SUMMARY

Aspiring Software Developer with strong foundation in Java, Python, Data Structures, and Full Stack Development. Skilled in building scalable applications using Spring Boot, REST APIs, React.js, and MySQL. Passionate about problem-solving, backend development, and learning Machine Learning concepts and algorithms.

EXPERIENCE

Full Stack Developer • The Brand Bee (Digital Marketing Company) Apr 2026 – Present

- Developed responsive web applications using **React.js, Next.js, Java, and CMS platforms** for client projects.
- Built and integrated frontend and backend features, APIs, and database systems for scalable applications.
- Collaborated with the digital marketing team to **create SEO-friendly** and performance-optimized websites.
- Worked on website customization, debugging, deployment, and maintenance for multiple business clients.

Full Stack Developer • Aptech Learning Gurugram Nov 2024 – Apr 2026

- Guided students in building end-to-end applications integrating frontend, backend, and database systems.
- Trained **500+ students** including B.Tech students and working IT professionals in Java Full Stack Development.
- Delivered hands-on training in **Spring Boot, JDBC, Hibernate**, and RESTful APIs.
- Trained students in **Data Analytics using Excel, Power BI, and SQL**.

EDUCATION

Bachelor of Science • Gurugram University 2025

Class 12th with Non-Med • Sanik Public School, Bhadurgarh, Haryana 2022

Class 10th • S.R Century Public School, Bhadurgarh, Haryana 2020

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript, SQL, Python

Frontend: HTML5, CSS3, React.js, Next.js, Bootstrap, Tailwind CSS, jQuery, Framer Motion, GSAP

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful APIs

Build & Dependency Management: Maven, Gradle, npm, Vite

Developer Tools: VS Code, IntelliJ IDEA, Eclipse, Git, GitHub, Postman

Databases: MongoDB, MySQL, PostgreSQL

Data & Analytics: Microsoft Excel, Power BI

CMS Tools: Shopify

Cloud & Hosting: AWS (EC2, S3), WHM/cPanel, Deployment, Linux Basics, Vercel

PERSONAL PROJECTS

Employee Management System

[Github](#)

- Developed a full-stack Employee Management System with secure role-based authentication for Admin and Employees.
- Built responsive frontend interfaces using **Thymeleaf**, Tailwind CSS, and modern **UI components** for dashboard and leave management.
- Implemented backend functionalities using Spring Boot, Spring Security, Spring Data JPA, and MySQL for employee, department, and leave operations.
- Deployed the application live on **AWS EC2 Ubuntu server with MySQL** database integration and remote production hosting.

BlueBird E-Commerce

[Github](#)

- Developed a full-stack e-commerce application with secure authentication, product management, and cart system.
- Built RESTful APIs to handle CRUD operations and transactional order processing.
- Integrated MySQL database using Hibernate/JPA for efficient data persistence.
- Managed dependency handling and project build using Maven.

The Brand Bird

[Github](#)

- Designed and developed a modern and responsive business website focusing on clean UI and smooth user experience.
- Built reusable React components such as Navbar, Service sections, About page, and interactive cards.
- Implemented smooth animations and transitions using Framer Motion.
- Created responsive layouts with Tailwind CSS ensuring compatibility across devices.

ACHIEVEMENTS

- Built **10+ REST APIs for product**, cart, and authentication modules.
- Designed scalable RESTful APIs handling secure authentication and database transactions.
- Successfully **trained 500+ students** including B.Tech students and IT professionals in Java Full Stack Development.
- **Maintained 90%+ student** project completion rate through hands-on mentorship and real-world demos.
- Gained hands-on experience in real-world client handling, deployment, and production support.
- Worked on scalable frontend architectures using React.js and Next.js for better maintainability.

PROBLEM SOLVING

- Solving **Data Structures and Algorithms** problems using Java and C++.
- Strong understanding of Arrays, Strings, Linked Lists, Sorting, Recursion, and Time Complexity.
- Practicing coding problems on LeetCode and GeeksforGeeks.
